Subject Index

Acidified glycerol lysis, test, an evaluation of (Rutherford *et al*), 119.
Alpha globin genotypes in two North European populations (Flint *et al*), 796.
Anaemia, aplastic, infective complications of (Keidan *et al*), 503.
Anaemia, aplastic, T cell-mediated inhibition of haematopoiesis in: seral assay of inhibitory activities of T cells to autologous CFU-E during immunosuppressive therapy (Hanada *et al*), 69.
Anaemia, sickle cell, alteration or red cell membrane organization in (Choe *et al*), 761.
Anti-cytomegalovirus antibody, production of, following T-cell depleted bone marrow transplant (Wimperis *et al*), 659.
Aplasia, pure and red cell: lymphocyte inhibition of erythropoiesis (Abkowitz *et al*), 59.

Book review
Hemostasis: a Case-orientated Approach, 799.

Canine platelet alloimmunization: the role of donor selection (Slichter *et al*), 713.
Coagulation, a pathway of, on bovine capillary endothelial cells (Nawroth *et al*), 309.
Congenital dyserythropoietic anaemia, unclassified type of, with prominent peripheral erythroblastosis (Bird *et al*), 797.
C-reactive protein measurements, the clinical usefulness of (Gozzard *et al*), 411.
Cytopenias, human parvovirus induced: a report of five cases (Saunders *et al*), 407.

Desferrioxamine and favism (Meloni *et al*), 394.
DR2, increased frequency of, in patients with aplastic anaemia and increased DR sharing in their parents (Chapuis *et al*), 51.

Erythrocytes, fetal, normal levels of ATP, total nucleotides and activities of three enzymes related to nucleotide metabolism in (Lestas *et al*), 471.
Erythropoieses, adult 'fetal-like', characterizes recovery from bone marrow transplantation (Weinberg *et al*), 415.

Factor VIII concentrates contain factor VIII procoagulant antigen bound to phospholipid (Kemball-Cook & Barrowcliffe), 425.
Factor VIII in placental endothelial cells, immunohistological localization of (Stel *et al*), 565.
Factor XI, a circulating anticoagulant inhibiting, in a patient with congenital deficiency and carcinoma of the prostate, studies on (Chediak *et al*), 123.
Folate deficiency, acquired, in phytohaemagglutinin-stimulated human lymphocytes (Matthews & Wickramasinghe), 281.

Globin gene abnormalities, five, in a Cambodian family, interaction of (Simpkins *et al*), 7.
Globoside: a murine monoclonal IgM antibody specific for blood group P antigen (von dem Borne *et al*), 35.
Glucose-6-phosphate dehydrogenase (G6DP) activity in individual erythrocytes, a sensitive cytochemical staining method for (Vives Corrons *et al*), 400.
Glucose-6-phosphate dehydrogenase deficiency, heterozygous, in erythrocytes, cytochemical determination of (Vogels *et al*), 403.
Graft failure, Late, following T cell depleted bone marrow transplantation, successful treatment of (Jackson & Franklin), 207.
Graft rejection following HLA matched T-lymphocyte depleted bone marrow transplantation (Patterson *et al*), 221.
Graft-versus-host disease, acute, female donors increase the risk of: effect of donor age and parity and analysis of cell subpopulations in the donor marrow inoculum (Atkinson *et al*), 231.
G6PD-deficiency infectious haemolysis: a complement dependent innocent bystander phenomenon (Kasper *et al*), 85.

Haemophiliacs and their spouses, HTLV-III antibody and T-cell subset ratios in (McVerry *et al*), 347.
HbH disease in Greece, the molecular basis of (Tzotzos *et al*), 263.
HbH disease in Sardinians, molecular pathology of (Paglietti *et al*), 485.
Hb J Cape Town, the haematological puzzle of, is partly solved (Lambridis *et al*), 363.
Heparin, low-molecular-weight, in venous thrombosis during pregnancy (Priollet *et al*), 605.

Idiopathic thrombocytopenic purpura, antigenic determinants in (Lynch & Howe), 301.
IgG, surface and internal platelet-associated, during platelet activation, liberation of (Pfueller & David), 785.
Immune thrombocytopenic purpura, chronic, complement activation *in vitro* by antiplatelet antibodies in (Tsubakio *et al*), 293.

Interferon γ, recombinant, in short-term and long-term marrow cultures, the myelosuppressive effect of (COUTINHO *et al*), 517.

Lactoferrin binds to neutrophilic membrane DNA (BENNETT *et al*), 105.
Leukaemia, acute, autoimmune thrombocytopenia and neutropenia after remission induction therapy for (CHAPMAN *et al*), 693.
Leukaemia, acute, in complete remission, autologue bone marrow transplantation for: a pilot study of 33 cases (CAHN *et al*), 457.
Leukaemia, acute lymphoblastic, after bone marrow transplantation for aplastic anaemia (KLINGEMAN *et al*), 47.
Leukaemia, acute megakaryoblastic, in children (CAIRNEY *et al*), 541.
Leukaemia, acute myeloid, in childhood: clinical features and prognosis (CHESSELLS *et al*), 555.
Leukaemia, acute myeloid, in remission, circulating blasts in (DHARMASENA & GALTON), 211.
Leukaemia, acute non-lymphocytic, cellular pharmacokinetics of daunomycin administered as continuous infusion in the treatment of (SPETH *et al*), 602.
Leukaemia, acute non-lymphocytic, prediction of response of patients with, to remission induction therapy: use of clinical measurements (PREISLER *et al*), 625.
Leukaemia, acute prolymphocytic, successful haematopoietic reconstitution using autologous peripheral blood mononucleated cells in a patient with (CASTDAIGNE *et al*), 209.
Leukaemia, acute promyelocytic, ultrastructure and cytogenetics in seven cases of (PEARSON *et al*), 247.
Leukaemia, an acute, augured before clinical signs by blood group antigen abnormalities and low levels of A and H blood group transferase activities in erythrocytes (LOPEZ *et al*), 535.
Leukaemia, a t(4;11) acute, with monocytoid blasts, immunoglobulin chain gene rearrangements in (SRIVASTAVA *et al*), 321.
Leukaemia, chronic granulocytic, purification of haemopoietic progenitor cells from patients with, using Percoll density gradients and elutriation (MARTIN *et al*), 189.
Leukaemia, chronic lymphocytic: an AIDS like disease? (KAY & MARKHAM), 389.
Leukaemia, chronic neutrophilic, and multiple myeloma, an association between, with a study of cobalamin-binding proteins (LEWIS *et al*), 173.
Leukaemia, hairy-cell, the treatment of, with 2′-deoxycoformycin (JOHNSTON *et al*), 525.
Leukaemia, human, bone marrow sinus and cell egress in: a morphometric study of core biopsies using wide-field electron microscopy (NAGAOKA *et al*), 737.
Leukaemia, Ph^1-positive chronic myelogenous, spontaneous regression of cytogenetic and haematological anomalies in (SMADJA *et al*), 257.
Leukaemia, prolymorphocytic, 'spontaneous' complete remission in acase of (BLECHER), 395.
Leukaemia, recurrent, reduced risk of, in bone marrow transplant recipients after cytomegalovirus infection (LONNQVIST *et al*), 671.
Leukaemia, T-helper prolymphocytic, successful remission induction with deoxycoformycin in elderly patients with (EL'AGNAF), 93.
Leukaemia, the relationship between chronic lymphocytic and prolymphocytic. I. (MELO *et al*), 377.
Lymphocyte function after autologous bone-marrow transplantation (BMT): a comparison with patients treated with allogeneic BMT and with chemotherapy only (ARMITAGE *et al*), 637.

Megakaryocyte colony formation by bone marrow progenitors in myelodysplastic syndromes (JUVONEN *et al*), 331.
Melphalan resistance in myeloma (HALL *et al*), 1.
Monocyte esterase deficiency, hereditary (MARKEY *et al*), 359.
Myelodyaplastic syndrome, diagnostic significance of detecting pseudo-Pelger-Huët anomalies and micromegakaryocytes in (KURIYAMA *et al*), 665.
Myelodysplastic syndromes, evolution of (TRICOT *et al*), 609.
Myelodysplastic syndromes, immunological abnormalities in. I, II (MUFTI, COPPLESTONE *et al*), 143, 149.
Myelodysplastic syndromes, the role of aggressive chemotherapy in the treatment of (TRICOT & BOOGAERTS), 477.
Myelofibrosis, immunohistochemical study of basement membrane proteins and type III procollagen in (APAJA-SARKKINEN *et al*), 571.
Myeloma, multiple, serum B_2-microglobulin in (VAN DOBBENBURGH & MARRINK), 795.
Myeloma, refractory or relapsing, combination chemotherapy with vincristine, doxorubicin, dexamethasone for (MONCODUIT *et al*), 599.
Myelomatosis, serum beta$_2$-microglobulin in (CHILD *et al*), 406.
Myeloperoxidase, human, biochemical characterization of, using three monoclonal antibodies (MORISHITA *et al*), 435.
Myeloproliferative disease, platelet-derived growth factor(s) mitogenic activity in patients with (BERNABEI *et al*), 353.

Neutropenia, autoimmune, and anti-granulocyte opsonic activity (HADLEY *et al*), 581.
Neutropenia, chronic idiopathic and secondary: clinical and serological investigations (VAN DER VEEN *et al*), 161.

Oxygen tension, the influence of, on the long-term growth *in vitro* of haemopoietic progenitor cells from human cord blood (SMITH & BROXMEYER), 29.

Philadelphia chromosome, late appearance of (JACOBSON *et al*), 392.
Ph^1 negative haematological chimaerism after marrow transplantation in Ph^1 positive chronic granulocytic leukaemia (VINCENT *et al*), 181.

Ph[1]-positive haemopoietic cells, and normal, competitive survival/proliferation of (FRASSONI *et al*), 135.
Plasmodium falciparum '*in vitro*', a reappraisal of the effects of iron and desferroixamine on the growth of: the unimportance of serum iron (PETO & THOMPSON), 273.
Platelet-derived growth factor stimulates growth of highly enriched multipotent haemopoietic progenitors (MICHALEVICZ *et al*), 591.
Platelet membrane glycoproteins Ib and IIb-IIIa, the role of, in platelet adherence to human artery subendothelium (SAKARIASSEN *et al*), 681.
Platelet prothrombin converting activity in hereditary disorders of platelet function (BEVERS *et al*), 335.
Polycythaemia, whole blood viscosity in: the effect of iron deficiency at a range of haemoglobin and packed cell volumes (VAN DE PETTE *et al*), 369.
Progesterone inhibits proliferation of human marrow colony forming cells (CFU-GM) through increased prostaglandin production by marrow macrophages (SMITH *et al*), 649.
Pyrimidine 5'-nucleotidase deficiency, hereditary, red cell metabolism in: effect of magnesium (LACHANT & TANAKA), 615.

Red cell survival data, analysis of (NOE & BELL), 398.

Serum sickness and haemopoietic recovery with antithymocyte globulin in bone marrow failure patients (BIELORY *et al*), 729.
Sickle cell disease, red cell alloimunization in (DAVIES *et al*), 241.
Stanozolol, therapeutic trial with: congenital plasminogen deficiency associated with venous thromboembolism (MANNUCCI *et al*), 753.
Stem cell proliferation, murine haemopoietic, a stimulator of, produced by human fetal liver cells (CORK *et al*), 775.

Thalassaemia, alpha, in an Italian population (VELATI *et al*), 497.
Thalassaemia, $^{G}\gamma^{A}\gamma$ $(\delta\beta)^{0}$-, and a new form of γ globin gene triplication identified in the Yugoslavian population (EFREMOV *et al*), 17.
Thalassaemia major, bone marrow transplantation in two multiply transfused patients with (BROCHSTEIN *et al*), 445.
Thalassaemia, the prenatal diagnosis of (CAO *et al*), 215.
Thrombocytopenia, amegakaryocytic, induced by antilymphocyte globulin (ALG), remission of (FÄLDT), 205.
Thrombocytopenia associated with gold therapy: a drug-induced autoimmune disease? (VON DEM BORNE *et al*), 509.
Thrombosis, central venous, due to bolus injections of antileukaemic chemotherapy (BAGLIN & BOUGHTON), 606.
Transferrin, failure to enhance iron absorption in achlorhydric human subjects (BEZWODA *et al*), 749.

von Willebrand factor, abnormalities of, in myeloproliferative disease: a relationship with bleeding diathesis (FABRIS *et al*), 75.
Von Willebrand factor contaminating porcine factor VIII concentrate (Hyate:C) causes platelet aggregation (ALTIERI *et al*), 703.
